Werkinstructies

A new tab will open where you will be able to view the lecturer feedback if they have added any.

Which file types are supported by Ouriginal?

The file types that are supported by Ouriginal are: .doc, .docx, .xls, .xlsx, .sxw, .ppt, .pptx, .pdf, .pdf 2.0, .txt, .rtf, .html, .htm, .wps, .odt, .odp, .ods, .tif, .tiff, .ps, .hwp, .pages (4), en .zip (.zip files are only supported when they are sent via email and not when they are uploaded via Assignments in Brightspace).

What is the visibility of my data for others who use Ouriginal?

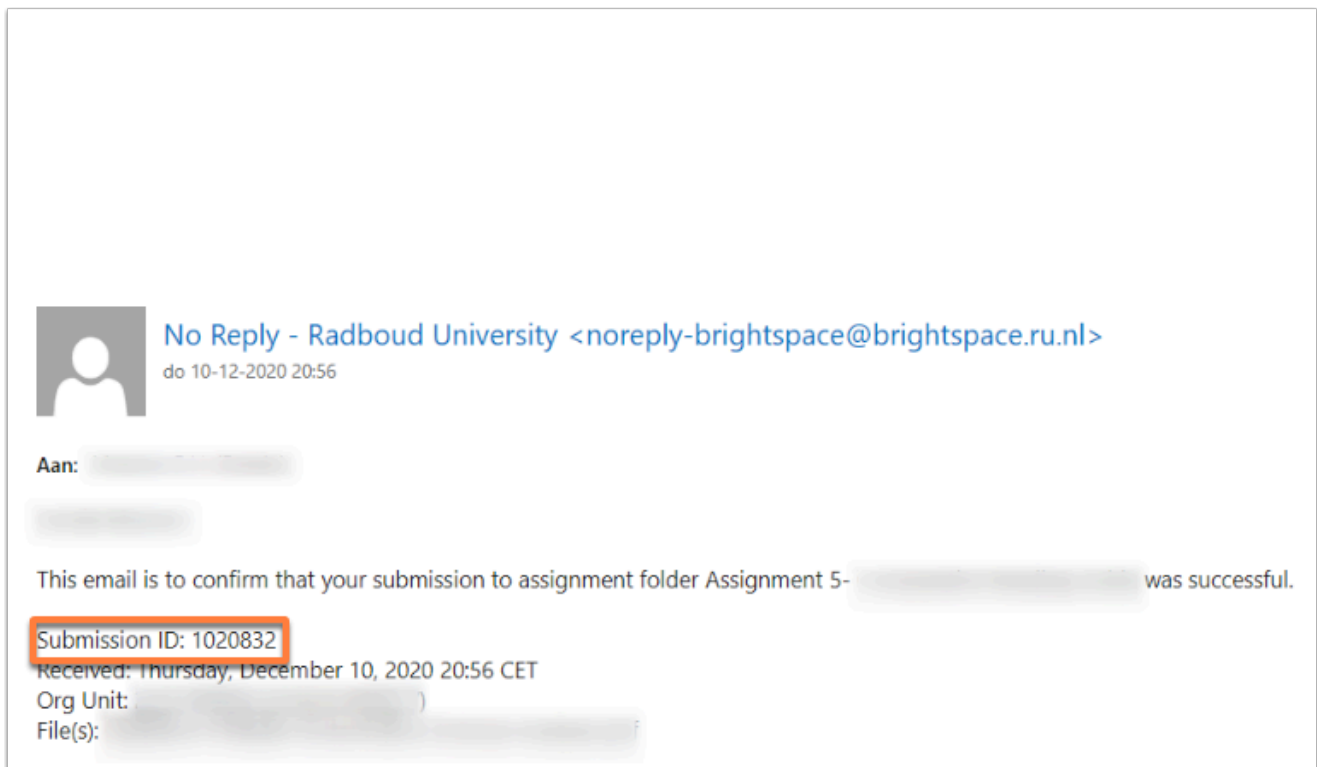

All documents that are submitted in an assignment that is linked to Ouriginal will be saved in the Ouriginal database. All of these documents are available as source to be used for future similarity checks.

The content of the file or the meta data of the file will not be shown to staff from other institutions by default. They can only see that similarity was detected from an anonymous source. RU lecturers will always be able to see the content and the meta data of documents submitted at the RU.

How do I remove my submitted document from the Ouriginal database?

If you want your submitted file to be removed from the Ouriginal database, then you can send a request to icto@ru.nl. Include the document number of the document that needs to be removed. You can find this number here:

Werkinstructies

- The confirmation email you received. The number can be found at **Submission ID**.
- In the similarity report. The number can be found at **Submission Details**.
- Ask the lecturer of your course if they can find the document number at **Activities > Ouriginal**. For students, the document number is not visible.

How do I not plagiarize myself?

To prevent self-plagiarism you have to make sure you always submit different versions of one document in Brightspace. Ouriginal does not compare the different versions of one document as long as they are from the same sender and are submitted in the same location.
